REASONS FOR ALLOWANCE

Election/Restrictions

Applicant's election without traverse of claims 1-14 and 20-36 in the reply filed on 3/3/2005 is acknowledged.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the recited cell array comprising a plurality of cells, each having a bipolar transistor and a storage component where each active region is shared by at least two bipolar transistors. The prior art also does not teach or suggest the recited memory device with the base regions of the bipolar transistors formed in areas overlying the semiconductor body.

Jamotkar, U.S. Patent No. 4,981,807 discloses a process for fabricating complementary vertical transistor memory cell. As shown in figure 1, memory cell 100 comprises bipolar NPN transistors 10, 30 and PNP transistors 20 and 40. Device structure 200 shown in Figure 2D, shows vertical NPN transistor 10 and vertical PNP transistor 20.

Wong, U.S. Patent 5,276,638, discloses a bipolar memory cell with isolated PNP load.
